

REPUBLICA ORIENTAL DEL URUGUAY

MINISTERIO DE INDUSTRIA, ENERGIA Y MINERIA

**MINISTERIO DE INDUSTRIA, ENERGÍA Y MINERÍA**

Montevideo, 06 JUN 2005

**VISTO:** las presentes actuaciones promovidas por la Dirección Nacional de Minería y Geología tendientes a declarar la caducidad del título minero PERMISO DE PROSPECCIÓN otorgado por resolución de 16 de febrero de 2004 a JUAN A. PEDRÓN PEREIRA, sobre un yacimiento de ágatas, amatistas y cuarzos en la 3ª Sección Catastral del Departamento de Artigas;-----

**RESULTANDO:** que el referido título fue otorgado por el plazo de 12 meses siendo notificado el titular el 20 febrero de 2004;-----

**CONSIDERANDO:** que habiéndose configurado la causal de vencimiento del plazo de validez del título minero prevista en el artículo 21, ordinal I), literal a), del Código de Minería, corresponde declarar su caducidad;-----

**ATENTO:** a lo informado por la Dirección Nacional de Minería y Geología y lo dictaminado por la Asesoría Jurídica del Ministerio de Industria, Energía y Minería;-----

**EL PRESIDENTE DE LA REPÚBLICA**

**RESUELVE:**

- AR 1º.- Declárase que se ha producido la caducidad del título minero PERMISO DE PROSPECCION otorgado por resolución de 16 de febrero de 2004 a JUAN A. PEDRÓN PEREIRA, sobre un yacimiento de ágatas, amatistas y cuarzos, afectando parcialmente el padrón 4787 en un área de 381 hás. 4815 m<sup>2</sup>, en la 3ª Sección Catastral del Departamento de Artigas.-----
- 2º.- Notifíquese, comuníquese y pase a la Dirección Nacional de Minería y Geología a sus efectos.-----

Dr. Tabaré Vázquez  
Presidente de la República

THE UNIVERSITY OF CHICAGO  
PHILOSOPHY DEPARTMENT

PHILOSOPHY 301: THE PHENOMENON OF CONSCIOUSNESS  
Lecture 1: Introduction to the Philosophy of Mind  
The central question of the philosophy of mind is the relationship between the mind and the body. This course will explore various theories of consciousness, including dualism, materialism, and functionalism. We will also examine the role of the brain in mental processes and the implications of modern neuroscience for our understanding of the mind.

1.1 The Mind-Body Problem  
The mind-body problem is the question of how the mind and the body are related. There are two main positions: dualism and materialism. Dualism holds that the mind is a non-physical substance, while materialism holds that the mind is a physical process. We will examine the arguments for and against each position.

1.2 The Phenomenon of Consciousness  
Consciousness is the state of being aware of one's surroundings and one's own thoughts. It is a complex phenomenon that has been the subject of much philosophical and scientific inquiry. We will explore the nature of consciousness and the role of the brain in its production.

1.3 The Role of the Brain  
The brain is the organ of the mind, and it plays a central role in mental processes. We will examine the structure and function of the brain and the implications of modern neuroscience for our understanding of the mind.

1.4 Dualism vs. Materialism  
Dualism is the view that the mind is a non-physical substance, while materialism is the view that the mind is a physical process. We will examine the arguments for and against each position.

1.5 Functionalism  
Functionalism is the view that mental states are defined by their functional roles. We will examine the arguments for and against functionalism.

1.6 The Hard Problem of Consciousness  
The hard problem of consciousness is the question of how physical processes in the brain give rise to the subjective experience of consciousness. We will examine the arguments for and against various solutions to this problem.

1.7 The Measure of Information  
The measure of information is a concept from information theory that has been applied to the study of the brain. We will examine the role of information in mental processes and the implications of modern neuroscience for our understanding of the mind.

1.8 The Role of the Brain in Mental Processes  
The brain is the organ of the mind, and it plays a central role in mental processes. We will examine the structure and function of the brain and the implications of modern neuroscience for our understanding of the mind.

1.9 The Implications of Modern Neuroscience  
Modern neuroscience has provided us with a wealth of information about the brain and its role in mental processes. We will examine the implications of this information for our understanding of the mind.

1.10 The Future of the Philosophy of Mind  
The philosophy of mind is a rapidly evolving field, and there are many exciting developments on the horizon. We will examine the future of the philosophy of mind and the role of the brain in mental processes.
